Callaway Diablo Octane Driver

Lighter, faster, stronger. It's what makes the all-new Diablo Octane Driver a revolution. Fueled by Forged Composite, a unique new material from Callaway that allows superior distribution of clubhead mass, compared with all-titanium drivers. The result? A lighter clubhead that retains an extremely high MOI. The Diablo Octane Driver powers drives beyond those of its all-titanium predecessor, the Diablo Edge Driver, by an average distance of 8 extra yards. Experience the most powerful driver ever imagined - the Diablo Octane Driver with Forged Composite.

### TaylorMade SuperFast 2.0 Driver

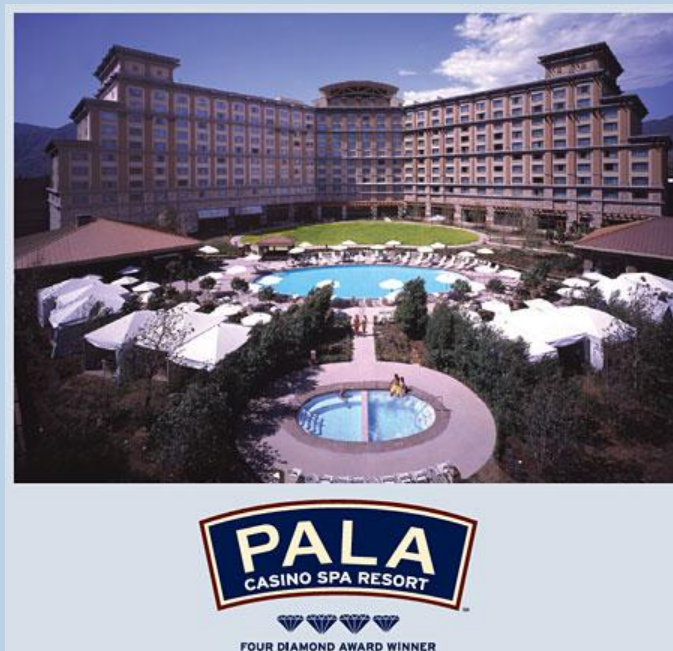

The TaylorMade Burner Superfast 2.0 Driver offers exceptional distance with extremely light weight. The aggressive head shape features drag-reducing geometry on the sole with a tapered back end for faster overall swing speeds which translates to more distance off the tee. Ultra-thin Wall technology on the inside reduces the wall thickness in the clubhead to allow for a larger face up front. This creates the biggest face on any TaylorMade Driver which gives you a larger hitting area with a larger sweet spot for more forgiveness. TaylorMade has also included the 2.0 technology, which engineers each club for more control, higher ball flight and an improved sound and feel.
