The health and safety of your family is our #1 priority. That’s why we have taken the following safety measures for all in-home services.

• All workers are wearing masks when providing services,
• Respite workers are washing their hands or using hand sanitizer upon entering and leaving each home,
• And, any employee who is experiencing a fever or symptoms must stay home and notify their supervisor immediately. Employees may not return to work until meeting the necessary criteria.

Before each session, you may choose to call your worker to confirm that they have not had any recent symptoms.

Please contact Wendy Smith, Respite Program Administrator, at 619-938-2876 or wendy@guidinghands.org, with any questions or concerns.
